Cannabinoid analyse %  
THC 0,01  
THCA 0  
CBD 3,9  
CBDA 0,9  
CBN 0  
THCV 0  
CBG 0,1  
CBC 0

Micrological screening

Not tested

The sample

Gives a full spectrum of cannabinoids

As a consequence, the entourage effect is well present.

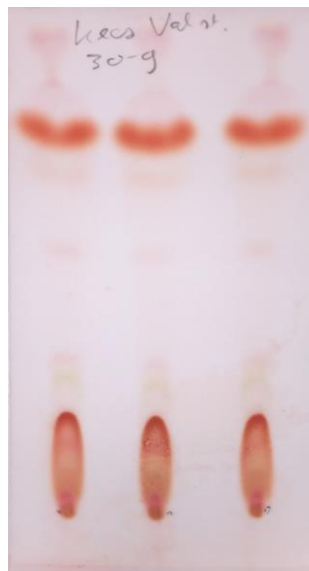

Is anti-inflammatory and inhibits the growth of malignant cells.

Continue to show very little chlorophyll.

Can be decarboxylated longer.

As a result, more THCA and CBDA will be transformed.

For maintenance use (stay healthy) that sample is very suitable.

Sincerely

*Artie de Lange*
